## Snuba Doo®

### The ultimate kids adventure

Ever imagine what it would be like to swim next to a school of fish or watch a sea turtle glide along beneath you? Well, stop imagining and start experiencing Snuba Doo, the ultimate kids adventure.

Developed by SNUBA® International, Inc., Snuba Doo is a power snorkeling system designed specifically for kids, ages 4 to 7. Snuba Doo kids wear a specially designed floatation vest that provides full time surface buoyancy. Each participant breathes through a second stage, scuba style regulator equipped with a child-sized mouthpiece. Air runs from a cylinder of compressed air located on the SNUBA raft, through a 10' airline, to the child's regulator. Kids comfortably breathe through the second stage regulator and never have to worry about sucking in salt water. The 10' airline also ensures that Snuba Doo kids never venture far from the comfort of the SNUBA raft. And, if kids become tired during the Snuba Doo adventure, they can always lay on the Snuba raft.

For kids that wish to keep up with their older siblings, parents, or family members, SNUBA and Snuba Doo provide the perfect shared experience. Participants ages 8 and up can SNUBA beneath the surface, while Snuba Doo kids swim directly above. A single Snuba raft can accommodate two SNUBA divers and one Snuba Doo child.

SNUBA and Snuba Doo require no certification and are ideal activities for vacationing families. Children and adults complete a pre-dive safety briefing and then accompany a certified Snuba Guide on their SNUBA tour. There is no hassle, no heavy equipment, no time consuming training, and the system is extremely safe. Over 5 million SNUBA dives have been conducted without a single injury claim.

There are more than 60 SNUBA locations worldwide, and families can easily incorporate SNUBA into their summer vacations. Snuba Doo welcomes all kids to experience the ultimate adventure!
